Vernier health report

Prepared Monday 24 August from what is stored on your Mac mini

Body

No body measurement is stored yet.

Latest blood test

No laboratory result is stored yet.

What this document is

A copy of what you recorded, with the source of every value beside it. It is not a medical document and it makes no clinical claim: where a reference interval is shown, it is the one your own laboratory printed on your own sheet.

Every value keeps the source it came from, and a correction never overwrites the reading it corrects. Where a day has no reading, this document says so rather than carrying the last one forward.
